

INTERNSHIP OPPORTUNITY

MAD Scientist Associates will be hiring 2-3 seasonal interns for the 2023 field season (May-August). This is a paid internship with flexible start and end dates. As an intern, you will become part of the MAD Team, assisting with a variety of field studies and restoration projects. You will become familiar with the environmental consulting industry and will gain valuable experience sampling, mapping, and assessing wetlands and streams, as well as participate in the construction planting, and management of restoration projects in Ohio and surrounding states. If you're interested in a challenging, yet rewarding and fun internship, we encourage you to apply!

Position Responsibilities & Duties

- Assist with field data collection on wetland and ecological studies and site inspections;
- Set-up and help manage education and volunteer events;
- Participation in plantings and invasive species control;
- Collect and manage GPS data to create maps;
- Enter and organize other types of field data;
- Assist with equipment management and errands;
- Manage light office duties as required.
